

Bim Awareness for Executives

Learn how to deliver BIM projects

Cadline

The Industry 4.0 Skillnet is proud to work with our partners Cadline who are an Autodesk Platinum Partner, Software Developer and market leading service provider with 30 years experience.

Programme Description

Through this one day session we will be exploring some of the limitations of traditional project practices and how we seek to improve on them using a collaborative BIM approach. We will also discuss industry drivers, the business benefits and identify potential risks of the absence of a BIM strategy.

Who Should Attend?

This course is aimed at board level executives and other senior decision makers who are seeking to understand how Building Information Modelling technology and workflows may impact their business strategy.

Qualification

On completion of the course you will be presented with an Autodesk Authorised Training Certificate.

Programme Agenda

- A review of current construction design and documentation practices
- A brief introduction to BIM
- The benefits of BIM
- The perceived Risks of BIM
- The government and BIM
- Current industry trends
- Your company and BIM
- Delivering BIM projects
- Final task – the lift pitch

Programme Outcomes

On completion of the course you will be presented with an Autodesk Authorised Training Certificate
